5. Type in "CurtinWireless" into the textbox.

A screenshot of the iPhone "Enter network information" screen. The title is "Other Network" with a "Cancel" button. The "Name" field contains "CurtinWireless". The "Security" field is set to "None" with a right arrow. A QWERTY keyboard is visible at the bottom, and a blue "Join" button is in the bottom right corner.

7. Enter your login credentials (windows account) after selecting WPA2 Enterprise, and select "Join".

A screenshot of the iPhone "Enter network information" screen. The title is "Other Network" with a "Cancel" button. The "Security" field is set to "WPA2 Enterprise" with a right arrow. The "Username" field contains "STUDENT\7D0A1234". The "Password" field contains several dots. A QWERTY keyboard is visible at the bottom, and a blue "Join" button is in the bottom right corner.

6. Select WPA2 Enterprise under "Security".

A screenshot of the iPhone "Enter network information" screen. The title is "Security" with a back arrow and "Other Network" label. A list of security options is shown: None, WEP, WPA, WPA2, WPA Enterprise, and WPA2 Enterprise. "WPA2 Enterprise" is selected, indicated by a checkmark on the right.

8. The wireless signal icon will be displayed with a tick beside the SSID (CurtinWireless). Select the ">" (arrow) to proceed.

A screenshot of the iPhone "Settings" screen, specifically the "Wi-Fi Networks" section. The "Wi-Fi" toggle is turned "ON". Under "Choose a Network...", "CurtinWireless" is selected, marked with a checkmark and a wireless signal icon. A blue arrow button next to "CurtinWireless" is highlighted with a red square. Other networks listed are "Streamyx Hot Spot" and "Other...". At the bottom, the "Ask to Join Networks" toggle is turned "ON".
